Imagine LAN Announces ConfigSafe® V8 for Windows Vista and XP

ConfigSafe® V8 software from imagine LAN provides Powerful System Protection for Windows Vista and XP PCs

Nashua, NH (PRWEB) November 26, 2007 -- imagine LAN, Inc. today announced the availability of ConfigSafe V8, the newest addition to the company's market-leading system health and recovery family of products.

ConfigSafe V8 continues the tradition of ConfigSafe, which pioneered Windows snapshot and restore technology, but it has been re-architected to operate with a smaller footprint and with markedly faster performance. ConfigSafe V8 also provides an option to utilize data from System Restore points - eliminating redundancy and conserving disk space.

ConfigSafe V8 goes beyond the traditional snapshot and restore functions to bring users powerful tools for viewing and comparing the Registry and file components (including Registry and file permissions) of snapshots - to help identify the existence and source of a configuration problem or possible malicious intrusion.

In addition, ConfigSafe V8 includes a module that provides Registry restoration for Vista and XP systems that are critically impaired and cannot boot into Windows.

A 30-day trial version of ConfigSafe V8 is available from the imagine LAN website (<http://www.imaginelan.com/configsafe/csv8.html>), and a single license can be purchased for an introductory price of \$39.00 (USD). Introductory pricing will be available through December 31, 2007.

About imagine LAN, Inc.

Founded in 1992, imagine LAN, Inc. develops mobility, system health and security applications designed to take advantage of the compact, portable nature of the USB flash drive and other portable systems and devices. Designed for Microsoft® Windows® users with multiple PCs and people with "on-the-go" lifestyles, imagine LAN provides innovative solutions that help users work (and play) more efficiently, productively, and with greater privacy and security. Currently, there are more than 30 million users of imagine LAN products worldwide. Customers include original equipment manufacturers (OEMs), Fortune 1000 corporations, government and educational institutions, resellers, small/home office and individual end users.
