Imagine LAN Announces UltraSync™ Availability for Windows® XP UMPCs, Tablets, Notebooks, and Desktops

UltraSync™ software from imagine LAN provides comprehensive digital content synchronization (files, music, pictures, video, Outlook® email, and browser favorites) between two Windows XP PCs over a wired or wireless LAN

(Nashua, NH, October 4, 2006) - imagine LAN, Inc., a leading developer of mobility and recovery software applications, today announced the availability of UltraSync version 1.5, a peer-to-peer, bi-directional PC synchronization application for synchronizing folders/files (music, pictures, documents, video, etc.), Outlook email, and browser favorites between any two Windows XP systems (UMPC, Tablet, Notebook or Desktop) using a wired or wireless local area network (LAN).

A 14-day trial of UltraSync software is available to download from imagine LAN's website at http://www.imaginelan.com/ultrasync/ultrasync_prod.html. The retail price for UltraSync v1.5 is \$30 (USD).

UltraSync Features

- File/Folder sync
- Outlook folder sync (messages, contacts, calendar, tasks, etc.)
- IE browser favorites sync
- Sync Selection Wizard
- Deletion Tracking
- Overwritten/Deleted file recovery
- AutoSync (automatically start sync process when a PC and its partner PC are connected via wired or wireless LAN)
- Skin Selector (decorative skin selection for the UltraSync "dashboard" UI)

Availability and Requirements

UltraSync is supported on Windows XP/SP2 systems with a minimum of 35MB of available space. Retail versions of UltraSync are available from imagine LAN immediately. An OEM version of UltraSync will begin shipping on select UMPC models in October.

Contact Jan Olsen at (603) 889-5889 or jolsen@imaginelan.com to arrange for a briefing or to obtain evaluation software.

About imagine LAN, Inc.
