Imagine LAN Announces UltraSync Portable™ for USB Flash Drives

UltraSync Portable™ software from imagine LAN provides comprehensive digital content synchronization (files, music, pictures, video, Outlook® email, and browser favorites) between Windows® PCs and USB flash drives

Nashua, NH (PRWEB) January 2, 2007 -- imagine LAN, Inc., a leading developer of mobility and recovery software applications, today announced the introduction of UltraSync Portable, an extension of the UltraSync™ family that has been specifically designed to meet the sync needs of USB flash drive users.

UltraSync Portable enables you to sync your Windows Vista or XP PC with your favorite USB flash drive or other portable memory device (microdrive, iPod®, MP3 player, etc.) and take all your favorite digital content (Files, Documents, Pictures, Internet Favorites, Music, Videos, and Outlook®) with you for use when you travel or use borrowed PCs. When you return, UltraSync Portable will automatically sync any changes made on both your PC and your flash drive.

UltraSync Portable runs from a USB flash drive and supports bi-directional sync partnerships (including deletion sync) with multiple PCs. In addition, UltraSync Portable provides a handy single direction migration feature to easily setup digital content on a new desktop, notebook, tablet, or UMPC.

"Since the introduction of UltraSync for UMPCs last August, we have had many requests from our customers to create a similar solution for USB flash drives." states DP Tsay, president of imagine LAN, "imagine LAN is widely known for its leadership in the development of portable applications and we are pleased to offer UltraSync Portable as a solution for simplifying the digital content synchronization process for flash drive users".

Availability and Requirements

A USB flash drive or other portable storage device is required to use UltraSync Portable. UltraSync Portable is supported on Windows Vista and Windows XP systems.

Both OEM and retail versions of UltraSync Portable will be available in Q1 2007. UltraSync Portable will be demonstrated at CES 2007. Contact Jan Olsen at (603) 889-5889 to arrange for a briefing or to obtain evaluation software.

About imagine LAN, Inc.

Founded in 1992, imagine LAN, Inc. develops mobility, system health and security applications designed to take advantage of the compact, portable nature of the USB flash drive and other portable systems and devices. Designed for Microsoft® Windows® users with multiple PCs and people with "on-the-go" lifestyles, imagine LAN provides innovative solutions that help users work (and play) more efficiently, productively, and with greater privacy and security. Currently, there are more than 30 million users of imagine LAN products worldwide. Customers include original equipment manufacturers (OEMs), Fortune 1000 corporations, government and educational institutions, resellers, small/home office and individual end users.

For more information about the UltraSync™ product family and other imagine LAN products, visit the company's Web site at <http://www.imaginelan.com>. imagine LAN is located at 74 Northeastern Blvd., Suite 12, Nashua, NH, 03062.
