imagine LAN Announces CPR - A System Recovery Tool for Non-Booting Windows Systems

CPR provides powerful protection and fast system recovery for Windows XP, Vista and 7 systems (32-bit and 64-bit).

Nashua, NH January 28, 2010 -- imagine LAN, Inc., a leading developer of system recovery and mobility software applications, today announced the availability of CPR for Windows XP, Vista, and 7 (32-bit and 64-bit versions).

CPR is a system recovery tool derived from the award-winning ConfigSafe[®] product line. CPR provides users with an easy-to-use tool for configuring and scheduling system snapshots for Windows-based PCs. Every PC user has encountered stability problems, system slowdowns, the "blue screen of death" and even a machine that refuses to boot. These problems are often a result of newly installed software or drivers altering important system files and settings which cause PCs to stop functioning properly. Manually hunting down every possible change that could have caused a problem is either too tedious or simply impossible. CPR allows users to periodically take system snapshots which save critical PC configurations and settings while a PC is working properly and restore system snapshots when a PC encounters a problem.

When a PC refuses to boot, typically the only option is to perform a reformat and reload of the operating systems and programs. CPR allows users to recover bootable and non-bootable PCs to a working state. Restoring a PC from a snapshot does not cause the loss of any data/documents during recovery. Users can also carry CPR on a portable storage device such as a USB flash drive and restore a system to a working snapshot directly from the device. Scheduling snapshots is easy. Snapshots can be taken daily, weekly, monthly or during every system boot up. CPR is

user-friendly and does not sit in the background consuming system resources. Simply install, schedule snapshots and forget it.

Corporate users, commercial organizations and resellers are encouraged to contact imagine LAN, Inc. Sales at ilisales@imaginelan.com to purchase a site license for corporate use or to bundle with other products or for redistribution. Customization is also available through this arrangement.

For more information on CPR, visit the imagine LAN website at <http://imaginelan.com/cpr/index.html>.
