### **imagine LAN Announces SRP (System Restore Point) Explorer for Windows 7, Vista and XP and ConfigSafe® V8 for Windows 7**

SRP Explorer and ConfigSafe V8 form a set of complementing solutions for Windows® system health and recovery designed particularly for viewing and comparing the registry hives of system snapshots.

---

Nashua, NH October 28, 2009 -- imagine LAN, Inc., a leading developer of system recovery and mobility software applications, today announced the availability of SRP Explorer for Windows 7, Vista, and XP also the support of ConfigSafe V8 for Windows 7 in addition to Windows Vista and XP. These tools are ideal for IT, support professionals and computer forensic experts.

SRP Explorer and ConfigSafe V8 are a set of powerful and complementing system health and recovery tools with highly sought-after features. SRP Explorer and ConfigSafe V8 allow for the viewing and comparing of the Registry (including Registry permissions) through system restore points (SRP Explorer) or system snapshots (ConfigSafe V8). These tools help identify the existence and source of a configuration problem, potential insider threat or possible malicious intrusion.

ConfigSafe V8, imagine LAN's market-leading system health and recovery software, includes a module that provides a Registry restoration function for critically impaired and unbootable Windows systems. ConfigSafe V8 is now officially supported under Windows 7 in addition to Windows Vista and XP for both x86 and x64 versions.

For support professionals and computer forensic experts of system health and security investigation, SRP Explorer is one software utility that does not need any explanation or justification. SRP Explorer can provide critical information about the unexpected changes that

have occurred to a system's registry hives after performing a system restore operation. SRP Explorer can generate and display the DIFF of selected registry hives (including registry permission changes) between two system restore points or between one system restore point and the LIVE state.

For more information or to try out a trial version of SRP Explorer or ConfigSafe V8, visit the imagine LAN website at <http://www.imaginelan.com/products.html>.
